

Technical Datasheet
Chemblend® FFD0065
Low Bloom Flame Retardant PP Masterbatch

Chemblend® FFD0065 is a proprietary blend developed by EnCom Polymers. It is used as an additive for increasing the flame resistance of Polypropylene. This additive is produced in a low melt, high impact PP base.

<i>Appearance:</i>	Off white color in round beads or cylindrical shaped pellets.
<i>Technical Data:</i>	This additive should be added to the base PP at the appropriate level to achieve desired flammability properties.
<i>Properties:</i>	Dust Free Pellet 6.5% active ingredients in the PP base
<i>Application:</i>	Injection Molding, Profile and Sheet Extrusion
